## Enrique Norten unveils Cassa

Enrique Norten has unveiled Cassa, a hotel condominium that will rise 500 feet high in the centre of Manhattan – on 45th street, between 5th and 6th Avenue, two blocks north of Bryant Park. Its towering facade will have a punctured rhythm of windows that run the full height of the building, giving it an iconic look like no other structure. Construction has already begun and the project is fully funded for completion by mid- 2010.

Cassa is the pinnacle of Enrique Norten's work. It will include 57 residences, 166 hotel rooms; all fitted with state of the art interiors. A full set of amenities will be provided for both residents and guests, including a world class restaurant, spa, private terrace and lounge, as well as additional services. The unveiling of the project falls on the 25th Anniversary of Enrique Norten's TEN Arquitectos.

Enrique Norten is a world renowned international architect who has worked on a diverse array of award winning and acclaimed architectural projects including the Guggenheim Museum Guadalajara (Mexico). Ten Arquitectos was founded by Enrique Norten and maintains offices in New York and Mexico City.
